Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 December 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Admitted Prior Art (APA) in view of Horie (U. S. Patent 6,224,391)

3. Regarding claims 1-4, APA, see figure 8, discloses a card adapter for accommodating a memory card and connecting an external device, the card adapter comprising: a frame member 81, 86 having an insertion slot at a front end thereof. An internal frame 81 mounted inside the frame member and having a lateral section and a rear section, a reception space being defined by the lateral section and the rear section of the internal frame together with a front edge and a lateral edge of the frame member, the internal frame having at least one internal frame having at least one terminal fastening plate extending therefrom towards the reception space, the terminal-fastening plate having a plurality of terminals. An adapting circuit board 87 having a plurality of electronic components and the contact pads, the contact pads being electrically connected with the electronic components and the terminals and a terminal connector mounted to a rear end of the frame member and having a plurality of contact pins connected with the adapting circuit board.

4. APA discloses the claim system except that while covers seem to be shown, these are not discussed. Horie discloses the cover use at 7,7. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify APA to provide the cover as taught by Horie so as to protect the internal circuitry.

5. Adapter 81 includes guide grooves, but since these are not discussed. Horie discloses at 25, 25, 23, 23 added for clear disclosure of use of such grooves. With APA adapter fixed in outer part 86, the entire body 81, 86 is read as an integral frame/internal frame. Basically with claim 1 drawn to cover an "integral" arrangement of inner and outer frames it does not clearly set forth limitations that avoid the prior art. Further with claim 1 being intended to cover such broad concept as well as the two parts embodiment, the APA connector 81 could similarly be broadly read as having one part (leg) integral with frame 86, the other part being a separate L-shape body held by retainers or adhesive in frame 86. Basically, the claims are broadly drawn to cover all embodiments and therefore may be broadly read when the prior art is applied.
